

UNIQUE VACUUM SOLUTIONS

VACUUM COMPONENTS

ISO KF FLANGE FITTINGS

The ISO KF range of vacuum flanges and fittings are made from high quality stainless steel grades like SS304, SS304L, SS316, SS316L and so on. The general purpose high vacuum applications are from SS304 material and the same are available ex – stock for most of the part numbers.

This method of KF assembly utilize a metal aluminum clamp for holding two similar flanges along with the centre ring and an rubber O ring, the wing nut clamp is used to dismantle the assembly as and when required, just by rotating the wing nut without using any tool.

The tight vacuum seal is possible by applying the pressure on the 15° tapered surface of the flange.

The mating parts of the two flanges, compresses the O ring (held in between the two flanges by an metal centre ring) making the assembly possible to work at vacuum levels up to 10^{-7} mbar and baked up to 200°C.

NW QUICK CLAMP – ALUMINIUM

PART NUMBER	PNEUROP	A	B
AL-CL-KF1016	NW16	40 (1.57)	64 (2.52)
AL-CL-KF-25	NW25	50 (1.97)	74 (2.91)
AL-CL-KF-40	NW40	65 (2.56)	89 (3.50)
AL-CL-KF-50	NW50	87 (3.43)	109 (4.29)

All measurements are in millimetres (inches in brackets)

NW CENTERING RINGS –
